

Statement Of Purpose

As someone has rightly said " With Position comes Responsibility ! ".

With this I start my statement of purpose for becoming the Hostel Alumni Secretary of Hostel 2 and why you should select me .

Becoming a part of any council you get a position of power and the responsibility that comes with it .I like taking responsibilities and I am known to complete the work allotted to me in time.

By becoming the HAS I will become an integral part of the Hostel 2 council and also SARC .In my opinion it is an excellent post for me as I will be directly connected to the hostel and institute alumni which greatly interests me. I will stay in direct contact with distinguished people who are at very good positions in respective fields and genres. I am good at maintaining a very good rapport with seniors and this will give me a chance of coming in contact with alumni too. It will increase my circle and I will gain a very good experience in handling and completing the important work allotted to me ,time management, database management ,being active on various threads and being in contact with various alumni and seniors.

Moreover, I will pitch ideas and requirements to the right person in the right manner. This will enhance my interpersonal and communication skills and boost my confidence to place my idea before the right person correctly.

I will be in contact with various people and update the alumni about the various activities that are taking place in the hostel and how our hostel and institute is performing at various levels. Being a part of the hostel council I will be actively involved in the various activities and help in improving the hostel culture by urging people to actively participate in different events.

Most importantly, as informed by seniors during groundwork, I will try to remove the existing debts that the hostel fund is facing by pitching my points correctly before the alumni and taking their help to the maximum extent possible.
