

# Manifesto

Harshvardhan Tibrewal

If elected as the **Computer and Web Secretary**, I propose to do the following -

## **WEBSITE**

- Maintenance and improvement of our **hostel website** is the prime concern right now.  
I will aid the sysad in doing so by all means necessary.
- The management of **mess portal** on the website. Ensure updating of mess menu on the website.
- Streamline the system of **the chrome extension** and H2 Mess bot by assisting the sysad.
- To maintain and update a database of **previous hostel records** of trophies and achievements as it finally is the pride of our hostel and is worth showing off!
- Updating and maintaining a **calendar** on the website showing upcoming important dates of festivals and other activities going on in the institute.

## **COMPUTER ROOM**

- To ensure that the computers present are in working condition and available to students when necessary.
- To ensure maintenance of computer room to be done on a weekly basis.
- Install the **printer** in the computer room so that it is accessible to hostel inmates in odd hours for printing and scanning purposes. Adequate security system will be maintained by linking the printouts and scans through the students LDAP Id and will be deducted from the mess account internally.

## **LAN related**

- To maintain effectively the complaint management system of the LAN networks in the hostel.
- Making arrangements for calling the vendor for emergency purposes and mass break down (or any equivalent situation which needs immediate attention).

## **GENERAL**

- Arranging hostel gaming nights effectively and generating enthusiasm among the hostel inmates in doing so. Applicable for other events also.
- Assisting the hostel council in any matters relating or non- relating to the designated responsibility.
- Arrangement of wifi routers such that there is wifi access to all places in the hostel.

## **INITIATIVE**

- I will arrange for **ubuntu** in all the computers in the computer room and increase the **RAM** and disk space of the **PC's** for the welfare of the users.
